### Colours Available

Copper Trim

Stainless Steel Trim

### STEAM

The benefits of steam cooking are well documented – colour and taste is preserved and a healthier vitamin content is retained. Smeg built-in steam ovens produce steam in the base of the oven which rises throughout the cavity for an even result.

### THERMOSEAL

The seal of Smeg's quality, technical excellence and taste: succulent roasts, crisp pastry and impressive baking is achieved in Smeg's unique, perfectly controlled cooking environment. ThermoSeal maintains the perfect atmospheric balance in the cavity for optimum cooking conditions.

### SMARTSENSE PLUS

Smeg's SmartSense Plus provides a foolproof, step-by-step guide to cooking. The large TFT colour display is clearly legible and simple to follow. SmartSense Plus also has 50 guided cooking programs and you can also save 10 of your most-used favourites.

### PYROLYTIC CLEANING

Smeg's pyrolytic cycle locks the door and heats the oven to around 500°C. This process carbonises food residue or burnt-on grease to a small amount of ash, which can be simply wiped away. Smeg also has Eco Pyro – to reduce energy consumption.

### SOFT CLOSE DOOR

The new soft-close mechanism on Smeg's oven doors ensures a two-stage soft and quiet close. Smeg's quality hinges also ensure the door will not drop on opening, an intrinsic safety feature.
