IMAGINE

Imagine putting your precious sweater in the washer. Imagine trusting a silk dress to a dryer.

We've not only imagined it, we've done it. Washed the black dress time after time. Dried a soft wool sweater over and over. Every time they emerge without shrinking or fading, still vibrant and soft, because AEG has redefined washing and drying. Protectors of fabric. Defenders of colour. Guardians of fibres.

Unprecedented care for the life of your clothes.

Imagine that.

EXTEND THE LIFE OF YOUR WARDROBE FAVOURITES

Top Tips

It is always best to follow the instructions on the fabric care label, but in some cases these may be outdated.

To help you care for your clothes, we've highlighted below our up-to-date advice.

Don't over wash

90% of the clothes we wash aren't dirty enough to be thrown in the laundry basket.

Lower temperatures

Temperature labels represent the maximum washing temperature, not the recommended one. A lower temperature isn't just gentler on the environment, but on the colours and fibres of your clothes too.

Avoid dry cleaning

This chemical heavy process can be hard on your clothes and the environment.

Silk wash program

The specialised silk program keeps the silks aloft in the cradle movement of the drum and uses reverse action in a very gentle and efficient way to reduce wrinkles.

ProSteam Technology

The steam reduces creases and folds. It is also perfect for refreshing clothes, as it absorbs odours.

Do tumble dry

No shrinkage guaranteed* with AbsoluteCare System Tumble Dryers, even when drying wool.

* Comparable with flat drying of wool

9000 SERIES | WASHING MACHINES

IT'S THE LITTLE BLACK DRESS GUARDIAN

Imagine a washing machine that you can trust to keep your colours vibrant and blacks as bold as the day you bought them. At last, there is no need to compromise performance for care. Because for the first time ever, AEG SoftWater technology removes the minerals from water that can be harsh on fabrics. Maintaining the colour, shape and feel of every garment. Wash after wash. It's more than a washing machine. It's the guardian of your clothes.

 **AEG SoftWater**
Purifies and softens water using a filter for a gentler wash on fabrics.

 **ÖKOMix Technology**
Unique pre-mixing of detergent, softener and water to reach every fibre.

 **ÖKOPower Program**
Superior cleaning results at 30°C in less than an hour.

9000 SERIES | TUMBLE DRYERS

IT'S THE DELICATE WOOL GUARDIAN

Never dared to tumble dry wool, silk or outdoor garments before? Now you can tumble dry everything you wash. From the softest wool sweater to the business shirt you wear every day.

Dryers with the AbsoluteCare System have tailored programming to control precisely the movement and temperature of the drying drum. Holding delicate fibres aloft so silks keep their shape and wrinkles are reduced. AbsoluteCare System: redefining tumble drying for every fabric in your wardrobe.

You can also use the Outdoor Program to restore water protection of outdoor garments better than air drying. This intelligent program adapts the rotation used for treating hand-wash woollens so there's no shrinkage.

 **AbsoluteCare System**
Intelligent drum movements and temperature adjustments for ultimate care of your clothes.

 **SensiDry® Technology**
Gentle and energy efficient drying at lower temperatures.

 **ProSense Technology**
Protects fabric from over drying by optimising time and energy consumption to suit individual loads.

8000 SERIES | WASHING MACHINES

INTRODUCING THE DELICATE SHIRT DEFENDER

Faultless fabric never goes out of style. Your delicate pieces need to be treated gently to ensure that their quality is timeless, no matter how often you wear them.

To achieve this, AEG 8000 series washing machines with advanced ÖKOMix Technology blend detergents and then softeners with water before they enter the drum. In other washing machines, less than half of the fibres are reached by softeners. ÖKOMix Technology guarantees that, for the first time ever, every fibre is cleaned and cared for, even with shorter cycles. Every thread, every stitch, every fibre. Expertly protected.

ÖKOMix Technology

Unique pre-mixing of detergent, softener and water to reach every fibre.

ÖKOPower Program

Superior cleaning results at 30°C in less than an hour.

ProSense Technology

Intelligent sensors optimise wash times to care for your clothes.

8000 SERIES | TUMBLE DRYERS

INTRODUCING THE WOOL SWEATER DEFENDER

Now you can tumble dry everything you wash. From the softest wool sweater to an everyday business shirt or ski jacket. Dryers with the AbsoluteCare System have tailored programming to precisely control the movement and temperature of the drying cycle. Preventing shrinkage. Maintaining shape. Restoring waterproofing. Redefining tumble drying for every fabric in your wardrobe.

AbsoluteCare System

Intelligent drum movements and temperature adjustments for ultimate care of your clothes.

SensiDry® Technology

Gentle and energy efficient drying at lower temperatures.

ProSense Technology

Protects fabric from over drying by optimising time and energy consumption to suit individual loads.

6000 SERIES | WASHING MACHINE

THE EVERYDAY CLASSIC PRESERVER

Quality clothes are made to be worn, but everyday pieces need care to maintain their condition. In AEG 6000 series washing machines, every load is measured to tailor each cycle and calculate just the right amount of water and energy the wash requires. Whether you wash one shirt or a full load, the washer will adjust accordingly, reducing wear and tear by taking the minimum amount of time necessary for a thorough clean. And reducing water, energy consumption and washing time for smaller loads. AEG washing machines keep clothes looking their best. Every wear, every wash.

ProSense Technology
Intelligent sensors optimise wash times to care for your clothes.

Steam Refresh
Quickly refresh your garments without the need for washing.

ÖKOInverter Motor
The ÖKOInverter motor works without brushes, extending the working life of the motor whilst using less energy.

6000 SERIES | TUMBLE DRYER

THE EVERYDAY QUALITY PRESERVER

Clothes that are exposed to too much heat and motion simply will not last. ProSense Technology in AEG tumble dryers uses temperature and humidity sensors to fine-tune the drying cycle every time, ensuring clothes are never over-dried. Whether you dry one shirt or a full load, the dryer will adjust accordingly to take the minimum time necessary. Reducing wear and tear. Protecting fabrics. Saving energy and time. Your everyday pieces are dried efficiently, monitored constantly and cared for cycle after cycle.

ProSense Technology
Protects fabrics from over drying by optimising time and energy consumption to suit individual loads.

ProTex Soft Drum
Special design to improve airflow and reduce tangling and creases.

Full Reversible Door
Simplified handling with the option of four different handle positions.

WASHING MACHINES EVERY FIBRE CLEANED AND PROTECTED

Imagine a washing machine that you can trust to keep your colours as vibrant and black as possible, whilst never compromising on cleaning performance.

A machine that washes deeply and thoroughly every single time. Finally, there's no need to compromise on performance or care with AEG.

It's time to care more for the clothes that mean something to us. Our washing machines keep clothes feeling like new. Even those one-of-a-kind pieces that are more than just fabric. We provide

incredible gentleness and superb washing results using the least energy.

Choose an AEG washing machine that can refresh tired clothes between washes with steam. Or one that optimises the performance of your detergent. You can even safely wash your woollens in all of them. It's more than just a washing machine, it's the guardian of your clothes.

ÖKOMIX

Whilst conventional washing machines need high temperatures to activate detergent and clean properly, AEG's ÖKOMix premixes the detergent in a separate chamber to activate all the enzymes before spraying on to your garments. So detergents can work at their best even in lower temperatures, to ensure the colour, shape and feel of each of your garments is maintained, wash after wash.

Silk wash program

The specialised silk program keeps the silks aloft in the cradle movement of the drum and uses reverse action in a very gentle and efficient way to reduce wrinkles.

ÖKOPower program

Our 8000 series washing machines, with fast-acting ÖKOMix Technology, come with a new ÖKOPower washing program. It takes just 59 minutes and produces outstanding cleaning results with minimal energy consumed during the cycle.

Woolmark Green / Woolmark Blue

'AEG gives consumers the confidence to put woollen garments into a machine, which has been lacking for the last 30-40 years.'

Peter Ackroyd,
The Woolmark Company

CARING FOR CLOTHES, SAVING WATER AND ENERGY

ProSense technology's intelligent sensors optimise and display the estimated wash time within 30 seconds of starting the wash cycle. Whether it is a few shirts or your entire weekly laundry, the wash time, water and energy consumption adjust to ensure they are only washed for the exact amount of time required. This ensures that fabrics suffer less wear and tear, maintaining colour and texture.

With ProSense Technology you get:
Faster load detection – quickly adapts the cycle after the program starts.

Higher accuracy – optimises the cycle based on the textile type by detecting the load size and measuring the water absorption.

Greater flexibility – adapts the cycle for even the smallest loads (1-2 kg).

ProSense
An optimised wash cycle results in less over-washing and less wear and tear.

PROSENSE LOAD SENSOR

Optimises water and energy usage and displays the estimated wash time within 30 seconds of the wash cycle starting.

STEAM REFRESH

Quickly refresh your garments without the need for washing.

ÖKOINVERTER MOTOR

Similar to professional machines, the ÖKOInverter motor works without brushes, extending the working life of the motor whilst using less energy.

PLUS STEAM*

Complete a wash cycle with steam to reduce wrinkles, saving time and reduce the need for ironing.

*Not applicable to all models

TIME SAVE

Reduces your washing time up to 50% on certain programs for smaller loads saving you energy and time.

AQUA CONTROL SYSTEM

Automatically shuts off the water inlet if a leak is detected in the hose.

WASH WITH CONFIDENCE

Your favourite pieces need to be treated gently to ensure their quality remains timeless no matter how often you wear them. ÖKOMix technology in the 9000 series washing machine guarantees that every fibre is cleaned and cared for.

9000 SERIES
LF9A1612A

8000 SERIES | WASHER DRYER

WASHER DRYER LONG LASTING PROTECTION FOR WASHING AND DRYING

The patented ÖKOMix Technology guarantees the most even washing and drying process in one go.

Unlike many other machines, ours pre-mixes detergents and softener to their most effective blends separately in water before they enter the drum. Meaning both are fully dissolved and activated when they reach the load. Making distribution more efficient than in any other washer dryer on the market. Ensuring that all fibres are penetrated and that the load is prepared for more even drying. So that every single part of every single item gets complete protection in less time.

- 

ÖKOMix Technology
Unique pre-mixing of detergent, softener and water to reach every fibre.
- 

ÖKOPower Program
Superior cleaning results at 30°C in less than an hour.
- 

ProSense Technology
Intelligent sensors optimise wash times to care for your clothes.

DUAL TECHNOLOGY FOR SENSITIVE CARE

Dualsense technology offers different programs to different types of fabrics. Lower heat and controlled movement mean that everything from delicates to outdoor wear can be carefully washed and dried in one go. Both washing and drying cycles are certified by Woolmark Blue to safely clean even hand-wash only woollens in one process. For outdoor wear, a dedicated wash cycle cleans and protects technical fabrics to preserve their textures over time; and a dedicated dry cycle works to restore water repelling properties.

ADJUSTED CYCLES FOR ABSOLUTE CONVENIENCE

ProSense Technology automatically adjusts washing and drying times to the size of the load. Enabling convenient and economical cycles – saving on time, energy and water – whether the load is small or big.

EXCELLENT RESULTS USING LESS TIME AND ENERGY

Our ÖKOPower NonStop 4h/5kg program offers the most efficient washing and drying cycles in the shortest time possible. Designed to wash and dry 5kg in four hours, it represents the most economical performance available on the market today, saving both time and energy.

SMOOTH WITH STEAM FOR LESS IRONING

The steam program from relaxes the fibres in your clothes to reduce wrinkles and avoid ironing. Ensuring they look and feel better for longer. The option to quickly refresh clothes without putting them through comprehensive cycles also means they stand the test of time with less exposure to temperature and motion.

WASHER DRYER

NEW

8000 SERIES

DRYERS PRECISE PROTECTION FOR YOUR CLOTHES

Never dared to tumble dry wool, silk or outdoor garments before? Now you can tumble dry everything you wash. From the softest wool sweater to the business shirt you wear every day. Dryers with the AbsoluteCare System have tailored programming to precisely control the movement and temperature of the drying drum ensuring every fabric gets the right movement and temperature to dry it completely whilst preserving its quality look and feel.

Woollens are kept flat against the drum to replicate flat drying. Outdoor garments are given just the right amount of heat to maintain functionality of their waterproof membrane. Silks are held aloft in the cradle movement of the drum to protect from damage. Every fabric gets the right drum action and temperature to dry it completely whilst preserving their quality look and feel.

The Woolmark Blue certification in drying will treat each item in the gentlest possible manner, meaning you can safely dry all of your woollen garments.

SENSIDRY® HEAT PUMP*

SensiDry® Technology is gentle and energy efficient through lower drying temperatures.

*Heat pump models only

PROTEX SOFT DRUM

Reverse tumbling action ensures better tumbling and airflow to result in even drying and less creasing.

8 ENERGY STAR RATING*

SensiDry® heat pump technology delivers the benefits of perfect drying at a much lower running cost.

*Up to 8 star rating on selected heat pump models only

PROSENSE DRYING SENSOR

ProSense protects fabrics from over drying by optimising time and energy consumption to suit individual loads.

ÖKOFLOW SINGLE FILTER

Single filter that is easy to reach and clean, maintaining drying effectiveness and energy efficiency of your dryer.

REVERSIBLE DOOR

Customise to your needs with four different handle positions.

DARE TO DRY EVEN YOUR HAND WASH ONLY ITEMS

Trust AEG with our AbsoluteCare System, where intuitive and intelligent technology have been carefully designed to dry even your most delicate hand wash only garments.

The fast drum speed motion ensures woollen garments lay flat on the inside of the drum walls to replicate flat drying.

There are no damaging movements in the drying cycle to shrink or felt delicate garments.

Designed for your outdoor garments, the outdoor cycle restores water protection, thanks to careful temperature control. An exact temperature is applied for a specific amount of time to maintain functionality of the garment.

Meanwhile, the specialised silk program keeps the silks aloft in the cradle movement of the drum running at a low speed and uses reverse action in a very gentle and efficient way to reduce wrinkles.

DRY WITH CONFIDENCE

Dare to dry garments you never thought you could with 9000 series tumble dryers – even your softest woollen sweater. Our Woolmark accredited tumble dryers come with our unique AbsoluteCare System, a tailored program that precisely controls the movement and temperature of the drying drum. Care more for your favourite clothes.

FIRST KLASSE CARE

Perfection is an AEG hallmark, backed by our complete commitment to customer care. We employ a dedicated service team ready to ensure your experience with AEG is nothing short of exceptional – every single day.

Same-day service*

Our technicians are trained to the highest AEG factory standards, ready to be deployed at a moment’s notice. Call from any major capital city before midday (12 noon EST) and we’ll be with you that very same day, if requested. Call after midday and we guarantee next day service with the option to accept a preferred two-hour window between 8am - 5pm, Monday to Friday within the metropolitan area.*

Dedicated contact centre

Like our products, our dedicated First Klasse Care Team offers unrivalled dependability. Contact us for delivery enquiries, installation details, product features, service updates and even product dimensions.

Prompt delivery & connection

At AEG, dedication to service begins long before your new appliance arrives. You can expect a call ten days prior to delivery to arrange the most suitable date, followed by a confirmation call on the eve of delivery to arrange the most suitable time of day.

Our professional AEG service personnel deliver to all major capital cities, and will unpack your new appliance and connect it to existing utilities^*. We’ll also remove your old appliance and all packaging to be environmentally recycled.

* Brisbane, Sydney, Melbourne, Adelaide, Perth.

* Delivery to regional and country areas can be arranged with your local retail store.

^ Only basic installations of laundry and dishwashers supported, limited to a 10 amp plug and lead. Please consult your relevant tradesperson.

AEG 5 YEAR GARANTIE

Perfection is nothing without endurance.

Every AEG product in our collection is equipped with our assurance that it will perform beyond expectations. It's called AEG – Garantie. You will receive a 5 year warranty with every product. Of course, it's nothing less than you'd expect of high performing German standards.

We Garantie it.

Warranty

Electrolux Home Products Pty Ltd and Electrolux (NZ) Limited (collectively Electrolux) warrants that for domestic applications the Appliances featured in this brochure are free from defects in materials and workmanship for 5 years, and warrants that for featured accessories a period of 12 months, following the date of original purchase and subject to the conditions set out in the warranty card accompanying the product when purchased. This warranty is in addition to the other rights and warranties you may have under the Australian Consumer Law (ACL) and Electrolux will at all times comply with its obligations at law including the ACL. For New Zealand customers Electrolux will at all times comply with its obligations pursuant to law including the Consumer Guarantees Act, the Sale of Goods Act and the Fair Trading Act. Where appliances are purchased in NZ for commercial purposes the Consumer Guarantees Act does not apply.

Product information

The descriptors and illustrations in this publication apply to the specific products and models described as at the date of issue. Under our policy of continuous product development, product specifications may change without notice. Prospective purchasers should therefore check with their retailer to ensure this publication correctly describes the products that are being offered for sale. All information supplied is to be used for general reference purposes only and is on the understanding that Electrolux Home Products Pty Ltd will not be liable for any loss, liability or damage of whatever kind arising as a result of reliance on such information. Colours of products illustrated are as close as printing limitations allow.
