## Heat Pump Condensing Dryer, 8kg

This Fisher & Paykel 8kg condensing dryer uses efficient heat pump technology to dry your clothes at lower temperatures for better clothes care.

White

## Dimensions

Depth	645mm
Height	A 850mm
Width	B 600mm

## Features & Benefits

### Energy efficient

An energy efficient heat pump dries your clothes and can help save on your electricity bill. Heat is pumped into an evaporator, where it is dehumidified before warm air is returned to the drum.

### Cares for clothes

Dry your clothes gently and with less shrinkage. Heat Pump technology uses a lower air temperature than a conventional dryer, giving you better clothes care.

### Easy installation

No venting is required so you can place this dryer anywhere in your home. A hose is provided to automatically drain moisture collected or use the internal tank which can be easily emptied.

### Drum light

A handy interior light turns on when you open the dryer door providing improved visibility inside the drum.

### Auto-sensing

Auto-sensing prevents over-drying by sensing moisture levels inside the drum and shutting off automatically. This helps clothes last for longer and reduces energy consumption.

### Perfect pair

Fisher & Paykel washers and dryers are designed to match and look stylish together in your laundry - they can be stacked to offer you more storage space.

## Specifications

### Consumption

Energy Usage (kWh/year)	155 kWh/year
Star Energy	7
