## X-Large 120" Light Rejection Screen Included\*

### Get the ultimate home cinema experience

4K Ultra HD uses over 8 million pixels to create a whole new world on an extra large Ambient Light Rejecting (ALR) screen. Images appear sharper, brighter and in their true colours from any viewing angle – just as the director intended.

\*X-Large 120" Light Rejection Screen included via redemption. Installation available at additional cost.

## Calman Calibration

### A Perfect Paired Solution

Calman Calibration software is an internationally recognised suite of tools used to calibrate televisions to their peak standard. As one of the only Laser Systems that always comes paired with its screen, Hisense Laser Cinema is perfectly calibrated to the exact screen it arrives with.

**HDR**

\*HDR 10 and HLG decoding

## HDR

### High Dynamic Range Enhances Details

High Dynamic Range (HDR) opens up a whole new range of colours and contrast, so you can enjoy a stunningly vibrant picture with incredible depth and rich details.

\*Data from Hisense internal Lab

## Unparalleled Brightness

### 2700 lumens

The ultra short throw Laser Cinema adopts X-Fusion™ technology which ensures 2700 lumens brightness. The console projects a colourful and bright 4K image onto an ambient light rejecting screen designed for watching in any room in the house. The picture is bright and detailed in all types of lighting, letting you enjoy the ultimate big TV viewing experience in a variety of room conditions.

## Smooth Motion

### Excellence in action

Through MEMC Technology with a microsecond-level processor response time, a motion rate 10-times faster than other Hisense TV's can deliver. Fast-moving images are smooth and clear, creating an unprecedented viewing experience for sports, action movies and gaming.

## DOLBY ATMOS

### A sound that puts you inside the action

A leap forward from surround sound, DOLBY ATMOS® transports you from an ordinary moment into an extraordinary experience with moving audio — sound that fills your room and flows around you with breathtaking realism to create a powerfully moving entertainment experience. It's never been easier to get the cinema sound experience at home.

VIDAA

## VIDAA 4

### A real Smart TV

Enjoy all the benefits of our VIDAA 4 OS and effortlessly switch between all your favourite apps (such as Netflix, YouTube, Prime Video, Stan, Kayo, Foxtel and more) to extend your entertainment experience. And watch live TV with the built-in TV tuner and catch up on the latest programmes. It can receive, process and display the broadcasting TV signal, it is a real TV.

**X-FUSION**  
LASER LIGHT SOURCE

25000+ Hours

# 25,000+

**25000**  
Long lifespan of over 25000 hour

**10000**  
Watch over 10000 moves

## X-Fusion™

### Pioneering laser technology

X-Fusion™ technology utilises a precise source delivering sharper images, more natural colours and 25,000+ hours of entertainment.

## Connectivity

With four (4) HDMI ports available, easily connect all of your audio / video systems and components from a simple cable box to the latest in gaming devices, 5.1 surround sound systems and more. Also, with ARC HDMI, the TV can connect to compatible audio devices through one single HDMI cable.

## Home Cinema

Every seat in your house becomes the best seat with the NEW Hisense 120" L5F Laser Cinema. Immerse yourself in this incredible home cinema product and experience the game, a movie or your favourite TV show like never before.

## 4K Ultra Short Throw Technology

The Ultra Short Throw Laser Cinema with minimalist design, only 35.2cm to the wall, it is pretty easy to install. Light-weight and slim screen can hang wirelessly, inconspicuously-elegantly to ensure a beautiful wall mounted fits any rooms and perfectly integrated into your lifestyle.
