Program your air conditioner
to turn on and off
automatically

Sleep mode

Manual operation

Auto restart
In the event of an interruption
in power supply the unit will
restart with the same settings
that were selected prior to the
power outage

BENEFITS

Be cool in no time at all
Ever popular, window/wall models give you the comfort of
reverse cycle air conditioning without the need for expensive
installation. In fact, some models are so relatively easy to
install you could even do it yourself.

Simple, economic and reliable
Because there are no separate indoor and outdoor units, its
easier to install a window wall cooling only model. And because
its a Kelvinator, you know it is reliable and built to last.

Compact
The super compact design means that window wall cooling only
air conditioners are discreet and unobtrusive in your home.
They are also perfect for cooling smaller family homes and
space-restricted areas.

Control from your armchair
The remote control unit lets you conveniently control all
functions

Fresh air delivery
The fresh air return provides additional ventilation to your room
and can also assist in humidity control. The easy-to-service
dust filter removes dust and other larger airborne particles for
cleaner air.
