# SHARP

#### **1000W Microwave Power** For efficient cooking

**Convection** For more cooking options

Inverter Technology For faster & more even cooking

Sensor Technology Takes the guesswork out of cooking

21 Auto Menus Pre-programmed for convenience

At Sharp Australia, we are firmly committed to meeting Australia's cooking preferences. All menus, auto/manual cooking charts and recipes for Sharp microwave ovens are developed and tested with locally sourced produce and the Australian consumer in mind. Building on over 50 years of experience, the Sharp range of conventional, convection, grill and steam commercial microwave ovens offer great technology, such as innovative flatbed, sensor and inverter technologies that blend into your kitchen décor and make it easy to produce meals quickly with food that looks and tastes great.

#### **Inverter Technology**

Cook with confidence using Inverter Technology as it ensures faster cooking, reheating and defrosting times through the controlled delivery of true power levels. A continuous flow of true power levels throughout the entire cooking procedure will reduce problems such as uneven cooking and the development of hotspots. Inverter microwaves don't have the need for a bulky and heavy power transformer, as they have a circuit board, so not only does this allow for a much lighter oven, but you'll also have more internal space to cook your favourite foods. It's that simple!

#### Sensor Technology

Eliminate all the guesswork. Humidity sensors monitor the amount of moisture rising from the food to determine cooking and reheating times. Put simply, Sensor Technology calculates the cooking or reheating times and power levels to produce perfect results every time. You can select from 4 sensor menus including reheat Casserole or cook Fresh Vegetables, Rice and Pasta.

### Convection

**CONVECTION** 

This additional cooking feature provides more versatility in the kitchen and allows you to cook a variety of delicious meals all in the one microwave oven. With 10 preset temperature settings ranging from 40°C to 250°C, the dry convection heat is circulated around the oven cavity,

producing food that is brown and crisp.

# SHARP

**R995DST** LARGE CONVECTION MICROWAVE

### **CONVENIENCE**

#### Grill

The Grill feature provides added convenience and more cooking options when cooking, browning and crisping food. A high and low rack are provided to ensure premium results no matter what food you are cooking.

#### **Mix Cooking**

This feature combines microwave power with convection heat or grill to produce the same great results in a shorter cook time.

#### Auto Menus

21 Auto Menus have been created using pre-set microwave power levels, convection temperatures or grill heat, with a set cook time to provide you with the best results every time for a range of popular dishes.

#### **More/Less Function**

At Sharp, we understand our auto menus will not suit the taste preferences of all Australians. With this great function, you can tailor the cooking time of the food to your personal liking by adding (more) or reducing (less) time on any of the pre-set auto menus or when cooking manually.

#### **Delay Start Feature**

This convenient function allows you to set your microwave to start cooking at any time of day, so food can be ready for you as soon as you walk through the door.

> Inverter Technology For faster and more efficient cooking
