rear left: 7.5 mj/hr semi rapid

TOTAL: 48.9 mj/hr

set for natural gas, regulator supplied, adapt for ULPG, no regulator required

flame failure device fitted to each burner

Standard inclusions

1 x cast-iron wok stand

1 x cast-iron coffee pot stand

Warranty

two years parts and labour

Functions

Main Oven

Main Oven

Convection (perimeter roof element+ floor element):

A gentle heat for long slow cooking of fruit cakes, casseroles & slow roasts. Single level cook using the middle zone of the oven to achieve perfect results.

Static Grill (perimeter roof element + inner roof element) :

Radiant heat is directed straight onto the top of your food. Use this function for toast, cheese melts, focaccia etc. Turn to this function toward the end of cooking if the food requires additional top browning. Oven door must be closed while grilling.

Base Heat (concealed floor element only):

Choose Base Heat for crisp pastry or any dish needing a higher base temperature. Base Heat will also keep a full oven hot without overcooking. Snowy white crisp Pavlova is easily achieved with this function.

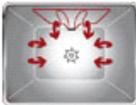

Half Static Grill (inner roof element):

All the benefits of static Grill but for small quantities of food. Place food front to back, down the centre of the tray. Oven door must be closed while grilling.

Supercook (fan+perimeter roof element+floor element+circular rear element):

Faster preheating. Perfect for roasting; after the meat is removed from the oven to rest, turn the temperature up to 220°C for the best roast potatoes.

Fan Grill (fan+perimeter roof element+inner roof element):

High power full width grilling producing succulent grilled meat, chicken or fish, while at the same time baking vegetables & dessert below. Also great for chips. With this function both top elements are being used. The oven door must be closed while grilling.

Defrost (fan only):

Defrost your frozen food without changing the appearance or character of the food with this fan assisted function. Choose length of defrost time by selecting a weight or a time.

Fan Forced (fan + circular rear element):

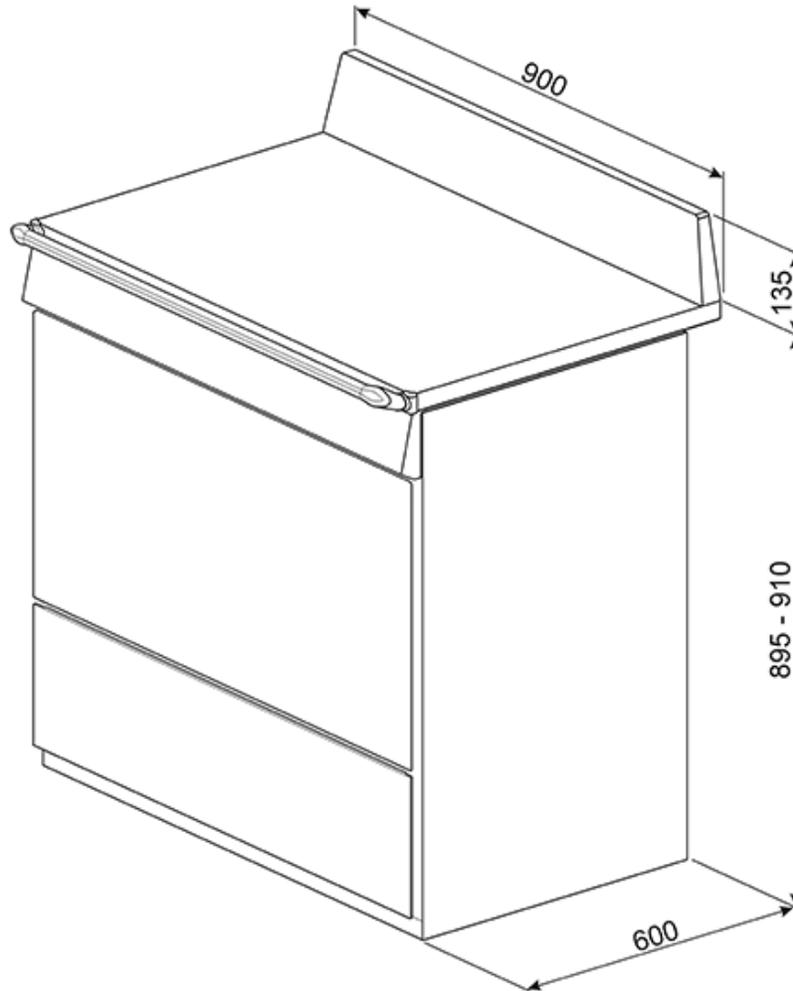

This versatile function is ideal for baking and roasting large quantities of food. It allows you to use every shelf position, including the oven floor, because the heat source is from the back of the oven.
