PRODUCT HIGHLIGHTS

DESIGNED IN ITALY BY DEEP DESIGN

Designed by renowned Milan design studio deepdesign, the Smeg fully automatic coffee machine pairs inimitable Italian style with the latest technology. Brew the perfect cup with a machine that will fit beautifully into any kitchen.

19 BAR PRESSURE

The Smeg Fully-automatic coffee machine uses a professional 19-bar pump pressure, which concentrates beans at an optimal level to give your coffee a rich taste and a crema top.

150G BEAN CAPACITY

The compact 150g capacity of Smeg's fully-automatic machine allows for ample storage of the freshest coffee beans. Neatly self-contained within the unit, the storage design affords more bench space in the kitchen. Start the day in style or entertain guests with a fragrant coffee ready in minutes.

7 COFFEE BEVERAGE FUNCTIONS

The BCC01 machine is perfect for the connoisseur who prefers a stronger coffee such as an Espresso, Americano or Ristretto. The perfect start to the day at the touch of a button.
