8.5 kg Front Loading Washing Machine

SteamCure Function - steam vapour rises from the bottom of the drum and can be selected during certain cycles. When steam vapour is distributed into the drum at the beginning of the program, it softens the dirt, making it easier to remove and giving better washing results. When steam is included at the end of the program, it makes laundry softer and reduces creasing.

Bluetooth connectivity - for status monitoring, program control & smart start mode as well as Download cycle. HomeWhiz App should be downloaded on Apple Store or Google Play and coupled with your machine.

Pet Hair Removal Function - this function can lead you a helping hand. It has a pre-wash, a special extra rinsing program and improved spinning cycles that helps get rid of the pet hair on your laundry. It is exclusive to Beko Washing Machines.

Stain Expert™ Program - this program can cope with an impressive 24 different types of stains. It offers various wash temperatures, a range of tumbling actions, optimised wash durations to help rid stains like coffee, tea, chocolate, grass, red wine, coke, curry, butter, mud, makeup & blood just to name a few.

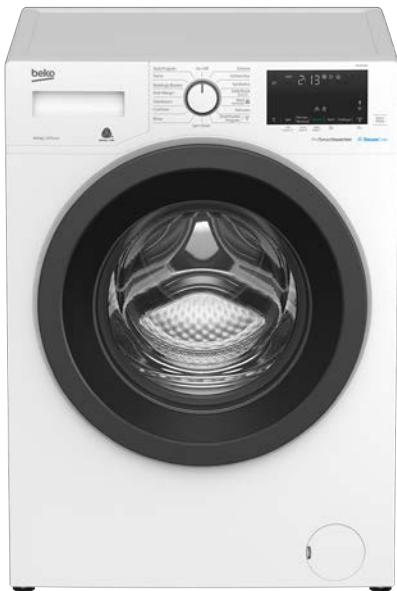

Fast+ Function - at the push of a button, you can shorten the length of programs up to 55%. It's not just a normal cycle cut short; a special washing algorithm with washing movement, optimised water level and heating period, enables a shorter & effective washing cycle.
