7kg Sensor Controlled Condensor Dryer

Optisense® Technology - Preventing over-drying, our sensor drying programmes identify the level of moisture in the drum and automatically stop the cycle when the optimal dryness level has been reached. As well as saving you time and money, your laundry will benefit from better care and protection.

Aquawave Drum - A specially designed drum pattern, with the help of paddles, gently moves your laundry in a wave-like drum action. So your clothes move smoothly around in the drum giving a better mixing effect while increasing drying performance and you save energy too.

Auto AntiCreasing - Perfect for those days when you can't unload your laundry right away, our automatic anti-creasing function rotates the drum periodically for up to 2 hours after a cycle has finished, separating your laundry to minimise creases.

Reverse Drum Action - If you're tired of unloading messy heaps of laundry, our reverse action drum can help. By separating your garments as they're drying, the drum helps to reduce creasing.

Easy Access Filter - You can effortlessly maintain your tumble dryer with our easily accessible filter.
