Flush fit (mm)	600	600	581 min.	20

Please note! Dimensions to be used as a guide only. All customers MUST refer to the user manual supplied with the product for detailed installation instructions.
*D - Dimension
For proper ventilation there must be a gap at the bottom rear of the cabinet. This cabinet is not 20mm deep or an equivalent, full width opening (e.g. a series of holes) with a min. size of 20mm. The opening must be clear of the product when fully installed. This is a requirement for EVE for our model Power probe connection for the pyrolytic. It must be accessible with the appliance fully installed. If the supply cable damaged must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
